

Conferencista Magistral

Integración de monitoreo con el modelamiento numérico

Stephen Meyer
Institute of Mine Seismology
Canada

Stephen is a director at the Institute Of Mine Seismology (IMS) Canada and head of the seismology group there. He has an MSc in Space Physics from the University of KwaZulu-Natal (Durban, South Africa) is currently doing a PhD in Earth Sciences (Mine Seismology) at the University of Tasmania (Hobart, Australia). He started his journey in mine seismology at IMS South Africa in 2011, before moving to IMS Australia where he worked for 9 years. In 2021 he joined IMS Canada which provides seismological services to the Americas and some mines in Europe. Stephen is interested in the application and utility of seismic source mechanisms in a mining environment, the classification of waveforms and seismic sources, and helping mines realize the maximum benefits from their seismic data.
